REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
2. The Amendment submitted on May 7, 2004 has been entered. Claims 6 and 7 have been cancelled. Claims 1 – 3 have been amended and claims 8 and 9 have been added. Therefore, the pending claims are 1 – 5, 8, and 9.
3. The amendment is sufficient to overcome the objections to claims 1 – 3 set forth in section 7 of the previous Office Action.
4. The amendments are sufficient to overcome the 35 USC 103 rejections based on Palumbo (WO 96/10979) since Palumbo does not teach using paper, tissue paper, closed or open cell foam, air laid fiber core, super absorbent particles, and combinations thereof, or other non-thermoplastic materials as the middle layer in the three-layer laminate.
5. The amendments are sufficient to overcome the 35 USC 103 rejections based on Benson (5,628,097) since Benson does not teach using paper, tissue paper, closed or open cell foam, air laid fiber core, super absorbent particles, and combinations thereof, or other non-thermoplastic materials as the middle layer in the spot-bonded three-layer laminate. Benson only discloses using a meltblown layer and suggests using a composite material with a film layer as the middle layer in the spot bonded composite material.
6. The drawings were received on May 7, 2004. These drawings are accepted.
7. The prior art fails to teach or fairly suggest a spot-bonded composite where the two outer layers are bonded together through a third layer which is made from paper, tissue paper, closed or open cell foam, air laid fiber core, super absorbent particles, and combinations thereof, or other non-thermoplastic materials. An updates search produced no new art of record.
